I. Limitations

Limitations

A. Universe

Estimates in this report are based on persons 18 years of age or older living in households located in Florida.

B. Sampling Error

Because the estimates included in this report are based on a sample selected from the sampling frame described in Section III.B.1, they will differ from a census of the universe using the same methods.

C. Non-Sampling Error

1. Non-Coverage Error

The sampling frame used to select the households and persons to be surveyed included households with a telephone. Therefore, non-telephone households were excluded.

2. Non-Response Error

The sample used for tabulating the estimates included in this report is not a perfect probability sample because the sample excluded persons that were not contacted or that refused to participate in the survey. The characteristics of non-contacted and non-cooperating persons may differ from the persons used in this report. The survey sample disposition is provided in Section IV of this report.

Limitations (cont'd)

C. Non-Sampling Error (cont'd)

3. Response Error

Some persons may not provide accurate information because they are unable or unwilling to do so or because they are unable to recall information. Despite efforts to maintain homogeneity in the interviewer techniques, interviewers may have influenced responses. Questionnaires, telephone interviewer monitoring and supervision were designed to reduce such response error. The extent to which such error occurred in this study is unknown.

4. Processing Errors

Although substantial efforts were made to ensure quality in the processing of the data collected, some deviations from instructions may have occurred.

The Nielsen Company

Limitations (cont'd)

D. Liability

The Nielsen Company shall not be responsible or liable in contract, tort or otherwise and Client expressly waives any claims against The Nielsen Company for any loss, injury or damage of any kind, present or prospective, including without limitation any direct, special, incidental or consequential damages (including without limitation lost profits and loss of or damage to goodwill) whether suffered by Client or any third party even if The Nielsen Company is advised or has knowledge of the possibility thereof, directly or indirectly resulting from any errors or inaccuracies in this report or from any action or inaction whether or not negligent of The Nielsen Company or any officer, agent or employee of The Nielsen Company in compiling or publishing this report or in delivering or communicating the same to Client or others, or from the use of publication of the same by Client or others. If any material errors or inaccuracies should occur in this report, it will be The Nielsen Company's policy, if feasible, to furnish appropriate correction notices which Client shall accept as its sole and exclusive remedy at law or in equity. In all other cases, in the event of the occurrence of any of the foregoing, Client shall accept as its sole and exclusive remedy at law or in equity an appropriate refund of any amount therefore paid or credited (at The Nielsen Company's option) with respect to this report.

II. Permissible Uses of This Study

The Nielsen Company

Permissible Uses

Nielsen clients are legally obligated -- by contract -- to disclose only limited excerpts of reports, data or the information contained therein (collectively, "Nielsen Information") to the extent necessary to conduct their business with the following persons:

Nielsen Client Category

Permitted Persons

Advertisers

- (a) Within the contracting client organization.
- (b) Those of their agencies or media buyers who subscribe to the same Nielsen Information.
- (c) Broadcast and cable networks subscribing to the same Nielsen Information.
- (d) Program producers, talent agencies, and artists serving or negotiating with the advertiser.

Agencies and/or Media Buyers

- (a) Within the contracting client organization.
- (b) Their clients.
- (c) Their prospective clients.
- (d) Broadcast and cable networks subscribing to the same Nielsen Information.
- (e) Program producers, talent agencies, and artists serving or negotiating with the agency or media buyer.

Broadcast Networks and Network Salespersons

- (a) Within the contracting client organization.
- (b) Program producers, talent agents, and artists.
- (c) Advertisers, advertising agencies, and media buyers.

Superstations, Cable Networks, and Cable Systems

- (a) Within the contracting client organization.
- (b) Program producers, artists, talent agents, advertisers, advertising agencies, media buyers, networks, stations, cable systems, and others with whom negotiations are being conducted.

Sports Leagues or Teams

- (a) Within the contracting client organization.
- (b) Those other teams or leagues who subscribe to the same Nielsen Information.
- (c) Those of their agencies or media buyers who subscribe to the same Nielsen Information.
- (d) Broadcast and cable networks subscribing to the same Nielsen Information.

The Nielsen Company

Program Producers, Talent Agents, and Artists

- (a) Within the contracting client organization.
- (b) Advertisers, agencies, media buyers, broadcast networks, cable networks, and stations with whom negotiations are being conducted.

For all Client Categories:

Third parties retained by Client for use solely on behalf of Client provided that each third party has entered into Nielsen's then standard form of agreement for such third party.

Under no circumstances may any party receiving Nielsen Information as permitted above, and not having a direct contractual relationship with Nielsen for the use of such Nielsen Information, use the disclosed Nielsen Information other than with Client as provided herein. These obligations are not changed in any way by the publication of the Nielsen Information (in any manner whatsoever) by Nielsen or others. Nielsen's written approval is required for quotation in advertising or press releases. The Nielsen Information is Nielsen's property in which Nielsen retains ownership and which Nielsen does not sell but licenses to clients for their use pursuant to client's contract. All persons are subject to liability for unauthorized use, reproduction, republication, or divulgence of the contents or any portion of the Nielsen Information.

III. Description of Methodology

Description of Methodology

A. Purpose

The purpose of this survey was to gather opinions and attitudes on a variety of topics from Florida residents, 18 years of age or older.

B. Sample Design and Selection Procedures

1. Sample Frame

A sample frame is a list of the sampling units that have a chance of being selected in the sample. The frame used for this study was a list of all telephone numbers among exchanges that were assigned to counties within the state of Florida. This includes any listed or unlisted telephone number generated randomly from those working blocks with at least one listed phone number as determined in development of Total Telephone Frame (TTF). This list is referred to as a restricted random digit dial (RDD) frame. Households without telephones are excluded from the frame and have no chance to be selected for the sample. Households with more than one telephone number have a greater chance of selection than households with one telephone number.

2. Sample Design

The sample consists of telephone households in the state of Florida. Prior to selection of the sample, the sample frame was stratified by geography to provide a proportionate geographic distribution of telephone numbers within seven geographic regions of Florida. A systematic sample of telephone numbers was selected such that the distribution across the regions mimics the distribution according to population estimates.

Description of Methodology (cont'd)

B. Sample Design and Selection Procedures (cont'd)

3. Sample Size

A sample of 186,512 numbers was selected for the survey. The sample was broken down into replicates with a size of approximately 200 each. Each replicate was representative of the state of Florida. The survey sample disposition is provided in Section IV.

C. Data Collection

1. Data Collection Period

The survey data collection was conducted from July 28 – September 4, 2012.

2. Data Collection Procedures

Telephone interviews, using a computer assisted telephone interviewing (CATI) system, were used to collect the information from the sample households. Interviews were conducted with a randomly selected household member at least 18 years old. Household members included any persons living at the selected residence. Up to five attempts were made to reach the selected respondent.

Interviews were conducted by trained, experienced interviewers from a supervised telephone center with facilities for monitoring interviews. Interviewers were given detailed instructions on procedures. The CATI system controlled callbacks to non-contacted households and ensured that each sample phone number received up to five attempts over a minimum of two days. The CATI system also controlled the administration of the interview by controlling question skip patterns and checking for logical or valid responses.

Description of Methodology (cont'd)

D. Weighting

An iterative proportional fitting algorithm is used to balance the sample to the set of characteristics below. This procedure applies an adjustment of weights in succession for each weighting control and performs this succession repeatedly until the sample matches the universe to within .01 (1%) for all characteristics.

To start the process, each respondent is given an initial weight. This weight is equal to the number of eligible respondents in the household. This weight is then adjusted for each of the weighting controls. The weighting adjustment is a ratio of the Universe Estimate (for the control category) to the sum of weights for the respondents included in the control category.

The weighting adjustment ratio is applied to the weight for each respondent included in the control category.

An iteration consists of sequentially adjusting each control once. After each iteration, the respondent weights are summed and compared to the Universe Estimate. If each control's sum of weights is within 1% of its Universe Estimate, the process stops. If not, another iteration is performed.

The Nielsen Company

Sunshine State Survey Weighting Controls – February, 2010					
Control	Characteristic		Weighting Sequence Number

E. Presentation of Results

Each table provides the base and weighted percents for the various responses to the question(s) on the table. For some questions, percents may sum to greater than 100% due to multiple responses or rounding. Percents may sum to less than 100% due to non-response.

IV. Sample Disposition

Sample Disposition

Initial Sample		186,512
Respondents Interviewed		6,952
Completed Interviews	1,485	
Closed Interviews, to meet targeted completes	5,467	
Respondents Not Interviewed		93,524
